

Animal Care

A.Coverost

Your innovative solution to control EHP challenges

Controls the parasite load
Reduces parasites impact on host performance

Optimizes animal welfare
Improves shrimps' environmental conditions

Improves shrimps' growth
Maximizes yield in challenging conditions
Improves economical results

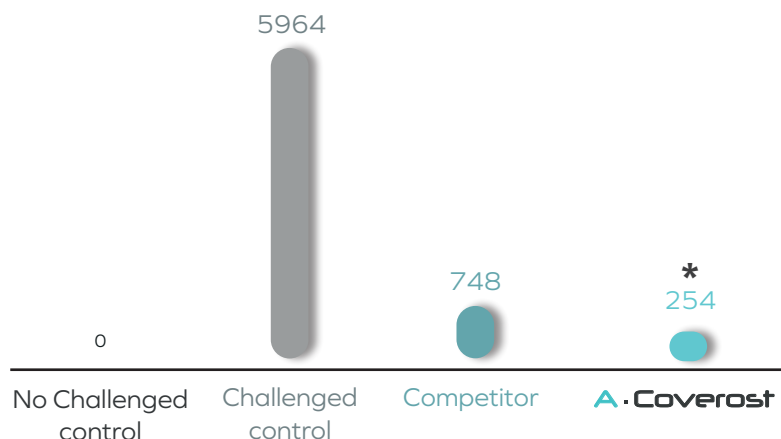

Controls the **EHP** load in gut by directly inhibiting the germination of EHP spores ...

A·Coverost

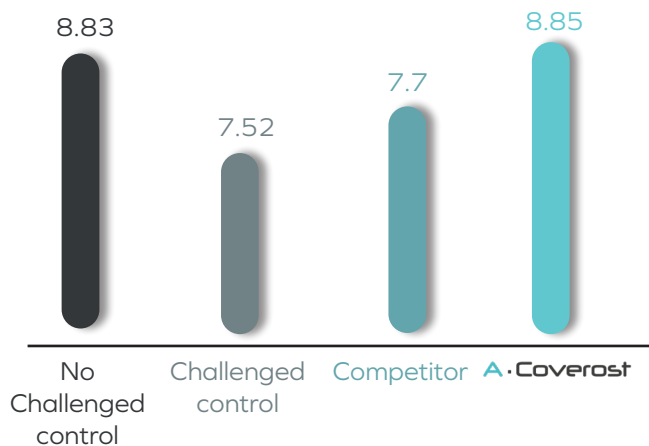

Results of in vitro tests run in Thailand and in vivo tests run in Vietnam

Final EHP (10^5 copies/g of HP)

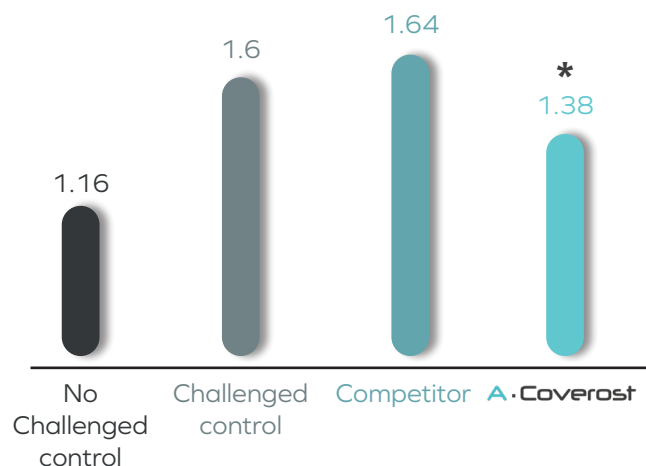

and prevents performance degradation

Final individual weight gain (g)

*p<0.05

FCR

16 kg
400 g

DLUO
24 months

DIRECTION FOR USE

- Apply continuously in shrimp feed in extrusion or on top coating
- 4 kg per ton
- From early stage
